

Project Executable Files

Date	15 March 2026
Team ID	
Project Name	Darshan ease
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	Yes
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes

10	Demo video or walkthrough (if required)	Yes
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Name	Date modified	Type	Size
Earlier this week			
 .gitignore	13-07-2026 11:36	Git Ignore Source ...	1 KB
 .prettierignore	13-07-2026 11:36	PRETTIERIGNORE ...	1 KB
 .prettierrc	13-07-2026 11:36	PRETTIERRC File	1 KB
 AGENTS	13-07-2026 11:36	Markdown Source ...	1 KB
 bun.lock	13-07-2026 11:36	LOCK File	183 KB
 bunfig	13-07-2026 11:36	Toml Source File	1 KB
 components	13-07-2026 11:36	JSON Source File	1 KB
 eslint.config.js	13-07-2026 11:36	JSFile	2 KB
 package	13-07-2026 11:36	JSON Source File	3 KB
 tsconfig	13-07-2026 11:36	JSON Source File	1 KB
 vite.config	13-07-2026 11:36	TS File	1 KB
 src	13-07-2026 11:36	File folder	
 .lovable	13-07-2026 11:36	File folder	
 public	13-07-2026 11:36	File folder	

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://darshan-ease-mu.vercel.app/
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	https://github.com/Deepu0321/darshan-ease

Demo Video Link

<https://drive.google.com/file/d/10v0fJeYrU0dZQDKTh0GhhKORbe-jca4r/view?usp=drivesdk>

Step 4: Run Instructions

Pre-requisites

- Node.js (v18 or above)
- MongoDB Community Server (v7.x or above)
- MongoDB Compass (Optional)
- Visual Studio Code
- Git
- npm (comes with Node.js)

Step 1: Clone the Repository

```
git clone <repository-url>
```

Step 2: Navigate to the Project Directory

```
cd darshan-ease
```

Step 3: Install Frontend Dependencies

```
npm install
```

Step 4: Install Backend Dependencies

```
cd backend
```

```
npm install
```

Step 5: Configure Environment Variables

Create a .env file inside the **backend** folder and add:

```
PORT=5000
```

```
MONGO_URI=your_mongodb_connection_string
```

```
JWT_SECRET=your_secret_key
```

Step 6: Start MongoDB Server

Ensure the MongoDB service is running before starting the backend.

Step 7: Run the Backend Server

```
cd backend
```

```
node server.js
```

The backend will run at:

<http://localhost:5000>

Step 8: Run the Frontend

Open a new terminal:

```
cd darshan-ease
```

```
npm run dev
```

The frontend will run at:

<http://localhost:5173>

Step 9: Access the Application

Open your browser and navigate to:

<http://localhost:5173>

Step 10: Test the APIs (Optional)

Use **Postman** or **Thunder Client** to test:

- User Registration
- User Login
- Temple Management
- Darshan Slot Management
- Booking APIs
- Donation APIs
- User Profile APIs
- Admin Dashboard APIs

These instructions are appropriate for inclusion in your project report under the **Run Instructions** or **Project Execution Steps** section.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround /status
1	Local deployment only	Successfully tested in the local development environment. Cloud deployment is planned as a future enhancement.
2	Payment gateway integration	Donation and payment features are currently simulated. Integration with secure payment gateways can be added in future releases.

3	Email/SMS notifications	Booking confirmations are displayed within the application. Automated email and SMS notifications are planned for future implementation.
