

Project Demo Planning

Date	04 July 2026
Team ID	
Project Name	Darshan ease
Maximum Marks	1 Mark

Project Demo Planning:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Technical architecture	The DarshanEase system uses the MERN Stack (MongoDB, Express.js, React.js, and Node.js) with REST APIs and JWT authentication to provide a secure and efficient online temple appointment booking platform.	3	N. Charan
2	Roles and Responsibilities	The project team was responsible for planning the system, developing the frontend and backend, designing the database, integrating modules, testing the application, fixing bugs, and preparing the project documentation to ensure the successful completion of the DarshanEase – Temple Appointment Booking System .	4	Kuruba Harshitha

3	User flow	The user flow begins with registration or login, followed by selecting a temple, choosing an available darshan slot, confirming the booking, optionally making a donation, viewing booking history, and finally logging out of the DarshanEase system.	2	Vallepu Hemalatha
4	MVC Pattern	The DarshanEase project follows the MVC (Model–View–Controller) pattern, where the Model manages database operations, the View provides the user interface, and the Controller handles application logic and user requests efficiently.	8	Sandhya Narnamangalam
5	Develpoment & Explanation	The DarshanEase system was developed using the MERN Stack , where each module was implemented, integrated, tested, and explained to ensure secure, efficient, and user-friendly temple appointment booking functionality.	3	Salman Nandaram
6	Final Conclusion & Future Scope	Explain project outcomes and future enhancements	2	Team members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Introduce the DarshanEase system and explain the challenges of traditional temple appointment booking, such as long queues, manual booking, and time consumption.
2	Solution Overview	Explain the MERN Stack architecture, REST APIs, JWT authentication, MongoDB database, and the overall workflow of the online booking system.
3	Live Feature Demonstration	Demonstrate user registration, login, temple browsing, darshan slot booking, donation management, profile management, and admin dashboard functionalities.
4	Q&A Session	Answer evaluator questions, explain the implemented modules, testing process, and discuss future enhancements such as online payments, notifications, cloud deployment, and a mobile application.
